Ian Parkinson

Full-Stack Developer

Experience

Houston, TX - Web Developer Consultant
March 2019 - Present

- Collaborated with clients, designers, and other developers to see projects through completion.
- Integrated client-side requests using REST APIs to send and retrieve data over a server
- Implemented client-side functionality for various sites and apps using React.js
- Conducted testing to ensure consistency within the design and functionality of a website

Side Projects

- **Roman Emperors** - https://romanemperors.netlify.com/

  This was a passion project of mine where I wanted a pleasant and intuitive way to view the history of Rome through its emperors.

- **Credit Card Form** - https://eager-albattani-24fdc1.netlify.com/

  A credit card form with number formatting, form handling and validation.

- **Stripe Like Navigation** https://condescending-keller-77d78c.netlify.app/

  A navigation menu based off of stripe.com.

Education

Economics

University of Houston - Houston, TX

August 2015 - May 2017
